

Product Information Short-Cycle Press Lines

Synchronous Pore Production

Application : Upgrading of woodbased panels and thin HDF primarily with melamine resin impregnated papers and décors in direct lamination process using the embossed in-register operation.

Products: Furniture panels, furniture elements, laminate flooring

TECHNICAL DATA	
Capacity	Up to 200 cycles/h
Spec. press pressure	Up to 1.000 N/cm ²
Length of heating platen	Up to 13,0 m
Width of heating platen	Up to 2,65 m
Thickness of carrier board	3 - 50 mm
Application	Single and double sided
Operation mode	1 - 3 carrier boards
Lay-up program	Automatic assembly of films and raw boards
Time of caul plate change	< 10 min.
