

## Wemhöner continues to grow

Herford, 2020-01-20

Wemhöner started its production in China in the city of Changzhou (Jiangsu province) in the summer of 2007 with around 3,500 m<sup>2</sup> of production space and was able to expand the production capacity to a total of 10,000 m<sup>2</sup> in two further construction phases.

Now another, second plant is being built in China, for which a new company has been established. The total area is 20,000 m<sup>2</sup>. The work will be completed in summer 2020. The new company will operate under the name Wemhoener (Changzhou) Machinery Technology Co, Ltd. and will use a good 6,800 m<sup>2</sup> in the first phase. This will include an architecturally appealing office complex with four floors. The area reserved for a further construction phase in the future is approx. 10,000 m<sup>2</sup>.

A large construction sign informs in Changzhou about the new plant.
